How to determine weight capacity

To determine the weight capacity for the Detail K2 Hitch Mounted Motorcycle Carrier, you must first determine the tongue weight limit of your hitch receiver AND the tongue weight limit of your vehicle. Take the lesser of these two figures and see the chart opposite:

Hitch / Vehicle Tongue Weight Limit (use lowest figure)		Max. Carrying Capacity of K2 Carrier	
300 lb.	136 kg	180 lb.	82 kg
350 lb.	159 kg	225 lb.	102 kg
500 lb.	227 kg.	350 lb.	159 kg
750 lb.	340 kg	450 lb.	204 kg

Example 1 If you have an SUV with a hitch receiver max. tongue weight of 500 lbs, AND your SUV manufacturer states that the maximum tongue weight for your vehicle is 500 lbs, then the maximum weight you can load on the Detail K2 Hitch Mounted Motorcycle Carrier is 350 lbs.

Example 2 If you have an SUV with a hitch receiver max. tongue weight of 500 lbs, BUT your SUV manufacturer states that the maximum tongue weight for your vehicle is only 350 lbs, then the maximum weight you can load on the Detail K2 Hitch Mounted Motorcycle Carrier is 225 lbs.
