HRX LAWN MOWERS

The New HRX: More Power, **More Torque, Same Price.**

The Honda HRX series lawn mowers offer an easy-starting and powerful new Honda GCV200 engine, with 10% more power* and torque. This allows for faster mowing and reduces stalling in thick grass.

The GCV200's new CycloFlow™ design strengthens turbulence in the cylinder, providing more stable combustion. This results in greater resistance to lower quality fuel, lower emissions, and improved ease of starting.

To improve ease of use and servicing, the GCV200 design includes an optimized oil filler position and a 60% larger fuel filler to prevent spills.

And all this power and technology is offered at a real value — the same cost** as the outgoing HRXK5 models!

HRX COMMON FEATURES

MicroCut® Twin Blades

Superior cut quality, mulching, and bagging

4-in-1 Versamow System with Clip Director®

Quickly switch between mulching, bagging, discharge, and leaf shredding

Rugged, Rust-Proof **NeXite® Deck** with Limited Lifetime Warranty
