DESCRIPTION & BENEFITS

The **Nova PRO-TEK 50mm (2") Jaws** provides stronger holding and more versatility with an improved dovetail AND serrated profile for maximum control. The unique woodworking dovetail profile pulls the project into the chuck and holds round and square blanks more firmly.

- Precision laser etched jaw numbering allowing ease of jaw and slide alignment, positioning and change out.
- Upgraded 6 point star fasteners exerting more torque with ease, offering better holding power and minimizing strip out for longer life.
- **Tenon Diameter:** Min Cylinder 45mm (1 1/4"), Max Cylinder 65mm (2 9/16). Min Square 40mm (1 9/16), Max Square 50mm (2")
- **Diameter of Recess:** Min 50mm (2"), Max 70mm (2 3/4")
