SOLAR PI10000X 1000 Watt Power Inverter from Clore Automotive

Clore Automotive introduces Model No. PI10000X, a 1000 Watt Power Inverter, from **SOLAR**. The 1000W model, featuring **SOLAR** Sonic Compression technology, is designed to deliver clean, reliable power from a 12 Volt power source to a wide variety of power equipment, electronics and appliances.

The PI10000X delivers 1000 Watts of continuous power and 2000 Watts peak power, enough to run a wide variety of power tools, appliances, electronics and equipment. Like all **SOLAR** Industrial Grade Power Inverters, the PI10000X model features temperature-activated fan control to eliminate unnecessary draining of the 12 Volt power source when in standby mode. It features two 110VAC outlets and an integrated mounting plate for fixed mounting on horizontal or vertical surfaces.

SOLAR Sonic Compression technology utilizes a proprietary modified sine wave design to provide stable, clean and reliable power throughout the operating range of the inverter. All models in the **SOLAR** Industrial Grade lineup utilize enhanced components and feature rugged construction to stand up to the most demanding of applications.

Clore Automotive is a leader in the design, development and manufacture of automotive service equipment for professionals and consumers, including jump starters, battery chargers, battery testers, power inverters, heavy-duty starting equipment, cooling system service equipment and automatic transmission fluid exchange equipment. More information can be found at www.cloreautomotive.com.
