

Yellow-Low Safety Dolly Owners Manual

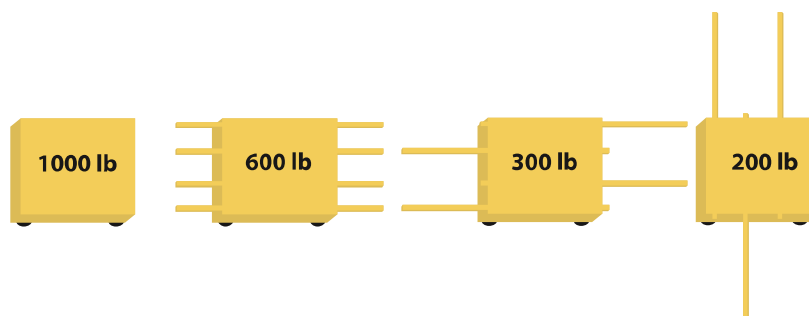

The "yel-Low Safety Dolly"

The yel-Low Safety Dolly is a truly innovative and "indestructible dolly" for the furniture and bedding industry. It can carry mattresses, head boards, desks, sofas, chairs and most items up to 1000 lbs. With a powder coated steel body the yel-Low dolly sits about 1 inch lower than a 4 inch floor dolly.

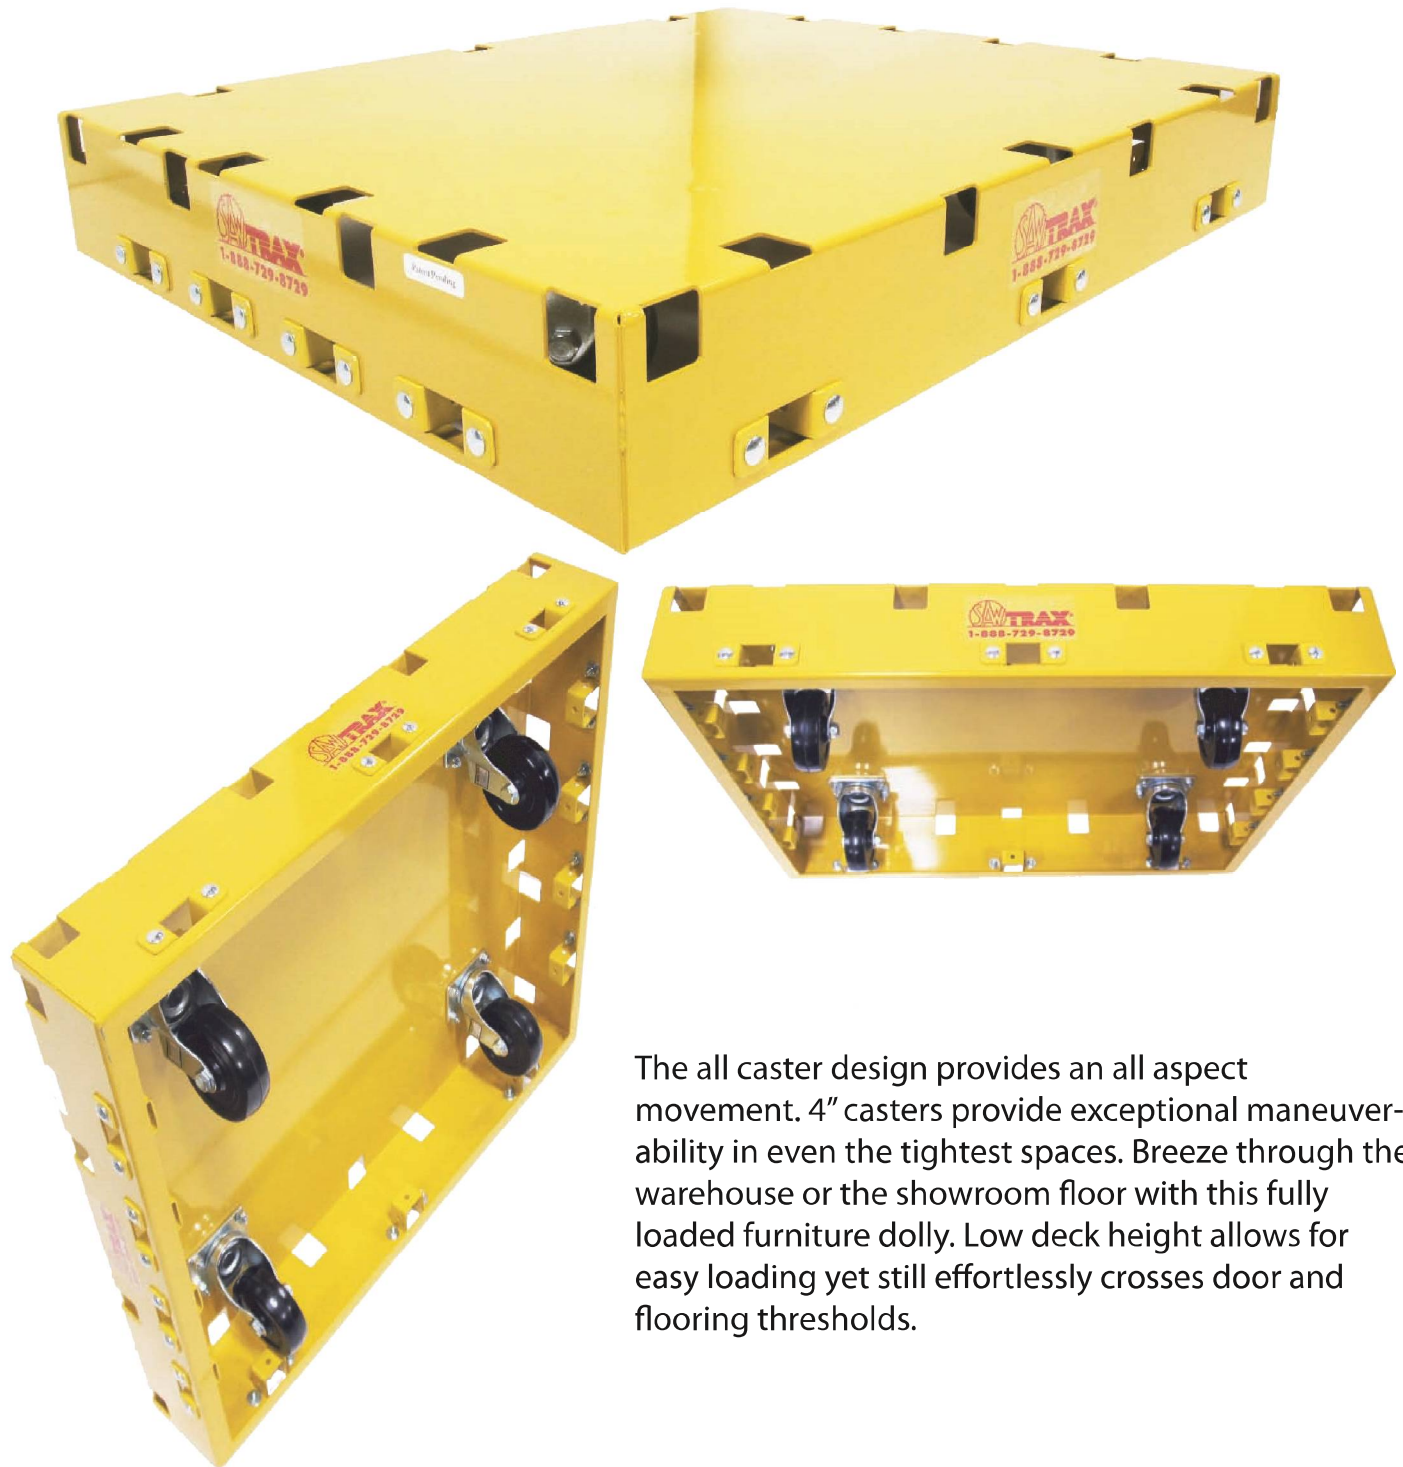

FEATURES: What makes this floor dolly unique is the post system that it employs. Posts can be used vertically to carry mattresses, headboards, flat screen TV's and thin pieces of furniture, like bookshelves, without the user having to balance the load. The post system can also be used horizontally to expand the carrying base up to 80 inches for carrying sofas or desks. They can also be used both vertically and horizontally to carry multiple rugs.

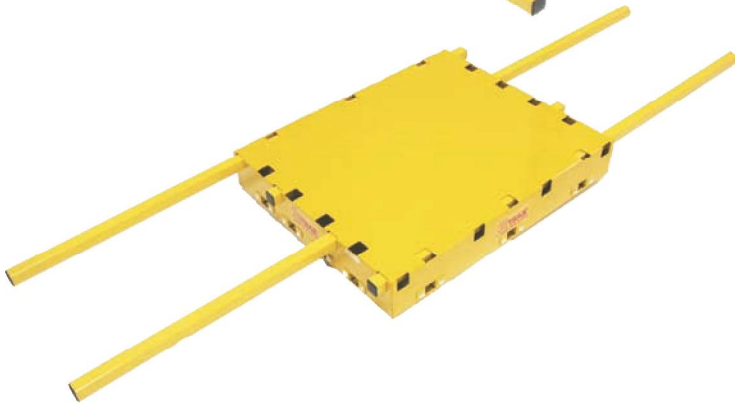

The yel-Low Safety Dolly is the most versatile rack in the industry

The all caster design provides an all aspect movement. 4" casters provide exceptional maneuverability in even the tightest spaces. Breeze through the warehouse or the showroom floor with this fully loaded furniture dolly. Low deck height allows for easy loading yet still effortlessly crosses door and flooring thresholds.

These posts will become your best friends
Posts can be used vertically and Horizontally

When using the posts in the horizontal position you can stagger the posts to increase the deck size from 30" to 80"! The yel-Low dolly ships with six 56" posts. Additional posts are available.
