

Operating Instructions and Parts Manual **16ga.** x **52-inch Pneumatic Shear**Model PS-1652E

WALTER MEIER (Manufacturing) Inc.

427 New Sanford Road LaVergne, Tennessee 37086 Ph.: 800-274-6848 www.waltermeier.com

Warranty and Service

Walter Meier (Manufacturing) Inc., warrants every product it sells. If one of our tools needs service or repair, one of our Authorized Service Centers located throughout the United States can give you quick service. In most cases, any of these Walter Meier Authorized Service Centers can authorize warranty repair, assist you in obtaining parts, or perform routine maintenance and major repair on your JET_® tools. For the name of an Authorized Service Center in your area call 1-800-274-6848.

MORE INFORMATION

Walter Meier is consistently adding new products to the line. For complete, up-to-date product information, check with your local Walter Meier distributor, or visit jettools.com.

WARRANTY

JET products carry a limited warranty which varies in duration based upon the product (MW = Metalworking, WW = Woodworking).

WHAT IS COVERED?

This warranty covers any defects in workmanship or materials subject to the exceptions stated below. Cutting tools, abrasives and other consumables are excluded from warranty coverage.

WHO IS COVERED?

This warranty covers only the initial purchaser of the product.

WHAT IS THE PERIOD OF COVERAGE?

The general JET warranty lasts for the time period specified in the product literature of each product.

WHAT IS NOT COVERED?

Five Year Warranties do not cover woodworking (WW) products used for commercial, industrial or educational purposes. Woodworking products with Five Year Warranties that are used for commercial, industrial or education purposes revert to a One Year Warranty. This warranty does not cover defects due directly or indirectly to misuse, abuse, negligence or accidents, normal wear-and-tear, improper repair or alterations, or lack of maintenance.

HOW TO GET SERVICE

The product or part must be returned for examination, postage prepaid, to a location designated by us. For the name of the location nearest you, please call 1-800-274-6848.

You must provide proof of initial purchase date and an explanation of the complaint must accompany the merchandise. If our inspection discloses a defect, we will repair or replace the product, or refund the purchase price, at our option. We will return the repaired product or replacement at our expense unless it is determined by us that there is no defect, or that the defect resulted from causes not within the scope of our warranty in which case we will, at your direction, dispose of or return the product. In the event you choose to have the product returned, you will be responsible for the shipping and handling costs of the return.

HOW STATE LAW APPLIES

This warranty gives you specific legal rights; you may also have other rights which vary from state to state.

LIMITATIONS ON THIS WARRANTY

WALTER MEIER (MANUFACTURING) INC., LIMITS ALL IMPLIED WARRANTIES TO THE PERIOD OF THE LIMITED WARRANTY FOR EACH PRODUCT. EXCEPT AS STATED HEREIN, ANY IMPLIED WARRANTIES OR MERCHANTABILITY AND FITNESS ARE EXCLUDED. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG THE IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU.

WALTER MEIER SHALL IN NO EVENT BE LIABLE FOR DEATH, INJURIES TO PERSONS OR PROPERTY, OR FOR INCIDENTAL, CONTINGENT, SPECIAL, OR CONSEQUENTIAL DAMAGES ARISING FROM THE USE OF OUR PRODUCTS. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.

Walter Meier sells through distributors only. The specifications in Walter Meier catalogs are given as general information and are not binding. Members of Walter Meier reserve the right to effect at any time, without prior notice, those alterations to parts, fittings, and accessory equipment which they may deem necessary for any reason whatsoever. JET⊚ branded products are not sold in Canada by Walter Meier.

PS-1652E Pneumatic Shear – Parts List	

- 1. Read and understand the entire owner's manual before attempting assembly or operation.
- 2. Read and understand the warnings posted on the machine and in this manual. Failure to comply with all of these warnings may cause serious injury. Replace the warning labels if they become obscured or removed.
- 3. This pneumatic shear is designed and intended for use by properly trained and experienced personnel only. If you are not familiar with the proper and safe operation of a shear, do not use until proper training and knowledge have been obtained.
- 4. Do not use this machine for other than its intended use. If used for other purposes, Walter Meier (Manufacturing), Inc. disclaims any real or implied warranty and holds itself harmless from any injury that may result from that use.
- 5. Always wear approved safety glasses/face shields while using this shear. Everyday eyeglasses only have impact resistant lenses; they are not safety glasses.
- 6. Do not wear loose clothing, gloves, neckties, rings, bracelets, or other jewelry which may get caught in moving parts. Wear protective hair covering to contain long hair. Non-slip footwear or anti-skid floor strips are recommended.
- 7. Some dust created by power sanding, sawing, grinding, drilling and other construction activities contains chemicals known to cause cancer, birth defects or other reproductive harm. Some examples of these chemicals are:
 - Lead from lead based paint.
 - Crystalline silica from bricks, cement and other masonry products.
 - Arsenic and chromium from chemically treated lumber.

Your risk of exposure varies, depending on how often you do this type of work. To reduce your exposure to these chemicals, work in a well-ventilated area and work with approved safety equipment, such as face or dust masks that are specifically designed to filter out microscopic particles.

- 8. Do not operate this machine while tired or under the influence of drugs, alcohol or any medication.
- 9. Do not exceed the rated capacity of this shear; use hand tools for small or narrow parts. Do not attempt to shear hardened materials.
- 10. Sheet metal stock has sharp edges. To prevent cuts, use caution when handling.
- 11. Keep hands and fingers clear of the area in front and rear of the shear.
- 12. Do not place your hands between material being sheared and the shear table.
- 13. Keep safety guards in place at all times when the machine is in use. If removed for maintenance purposes, use extreme caution and replace the guards immediately after maintenance is complete.
- 14. Check damaged parts. Before further use of the machine, a guard or other part that is damaged should be carefully checked to determine that it will operate properly and perform its intended function. Check for alignment of moving parts, binding of moving parts, breakage of parts, mounting and any other conditions that may affect its operation. A guard or other part that is damaged should be properly repaired or replaced.
- 15. Provide for adequate space surrounding work area and non-glare, overhead lighting.
- 16. Keep the floor around the machine clean and free of scrap material, oil and grease.
- 17. Keep visitors a safe distance from the work area. **Keep children away.**
- 18. Make your workshop child proof with padlocks, master switches or by removing starter keys.
- 19. Give your work undivided attention. Looking around, carrying on a conversation and "horse-play" are careless acts that can result in serious injury.
- 20. Maintain a balanced stance at all times so that you do not fall or lean against moving parts. Do not overreach or use excessive force to perform any machine operation.
- 21. Use the right tool at the correct speed and feed rate. Do not force a tool or attachment to do a job for which it was not designed. The right tool will do the job better and more safely.
- 22. Use recommended accessories; improper accessories may be hazardous.

- 23. Maintain tools with care. Keep tools sharp and clean for the best and safest performance. Follow instructions for lubricating and changing accessories.
- 24. Do not stand on the machine. Serious injury could occur if the machine tips over.
- 25. Unplug or lock out power to the machine when not in use.

Familiarize yourself with the following safety notices used in this manual:

This means that if precautions are not heeded, it may result in minor injury and/or possible machine damage.

This means that if precautions are not heeded, it may result in serious or even fatal injury.

-- SAVE THESE INSTRUCTIONS --

Introduction

This manual is provided by Walter Meier (Manufacturing) Inc., covering the safe operation and maintenance procedures for a JET Model PS-1652E Pneumatic Shear. This manual contains instructions on installation, safety precautions, maintenance instructions and parts breakdown. This machine has been designed and constructed to provide years of trouble free operation if used in accordance with instructions set forth in this manual. If there are any questions or comments, please contact either your local supplier or Walter Meier. Walter Meier can also be reached at our web site: www.waltermeier.com.

Specifications

Model NumberStock Number	PS-1652E
Material Thickness Capacity – Mild Steel	
Material Thickness Capacity – Aluminum and Copper Alloys	
Shearing Length Capacity (in.)	52
Back Gauge Capacity (in.)	25-1/2
Front Gauge Capacity (in.)	28
Foot Control Valve	110V, 60Hz
Operating/Maximum Air Pressure (psi)	85-100 (0.6-0.7 Mpa)
Air Consumption (approx. cfm)	25.4
Air Consumption per Stroke (approx. cfm)	
Recommended Air Hose Diameter (in.)	
Air Hose Inlet (NPT/in.)	3/8
Strokes Per Minute	
Overall Dimensions (LxWxH)(in.)	65 x 27 x 41
Overall Floor Space Required (in.)	65 x 83
Net Weight, approximate (lbs.)	1048
Shipping Weight, approximate (lbs.)	

The above specifications were current at the time this manual was published, but because of our policy of continuous improvement, Walter Meier reserves the right to change specifications at any time and without prior notice, without incurring obligations.

Uncrating and Clean-Up

- 1. Remove the crating material from around the machine.
- Carefully clean all rust protected surfaces with a mild solvent or kerosene and a soft rag. Do not use lacquer thinner, paint thinner, or gasoline, as these may damage painted surfaces.
- 3. Coat all machined surfaces with a light coat of oil to inhibit rust.
- Remove the bolts holding the machine to the skid.
- 5. Carefully move the machine to a level foundation. Machine location must allow access to all sides.

Assembly Note: Prior to shipment the pneumatic shear is adjusted at the factory for proper operation. If the machine does not operate properly or the stand does not sit squarely on the floor, proceed to setup.

Stop Assembly

Refer to Figure 1. (The numbers in parentheses refer to the corresponding part in the exploded view.)

- 1. Attach the two front arm extensions (6) to the bed with four hex cap screws (7) and four washers (76). Level the arm extension surfaces with the table before tightening.
- 2. Attach the *front stop* (71) to the front extension arms with T-screws (72) and wing nuts (74).
- 3. Attach the *rear stop* (59) to the *adjusting block* assemblies (61) with six hex cap screws (68) and six flat washers (77).
- 4. Insert a *scale rod* (58) through each adjusting block assembly and into the cutter bar. Orient each rod according to which scale you prefer, standard or metric.
- 5. Secure the rods in the cutter bar by tightening the two hex cap screws (40). Tighten the rods in the adjusting blocks with the four knobs (65).

Setup

 If the table requires adjustment, loosen four bolts (21). Loosen adjusting screws (18) and (19). The bed must rest squarely on the right and left hand side panels at all four corners while screws are loose. Shim legs at floor if necessary. Tighten hardware. 2. Use set screw (18) and hex cap screw (19), to adjust the lower blade toward or away from the upper blade. The distance between the upper and lower blades should be 0.002-0.005".

Do not let the blades overlap.

- 3. Connect shear to electrical supply, and adjust the air pressure until the gauge reads approximately 90 psi.
- 4. Place a heavy sheet of paper (~0.005") in the cutting position, along the entire length of the bed, and slowly press the foot lever.
- 5. If the shear does not cut the paper move the lower blade towards the upper blade.
- 6. If the shear cuts the paper on the ends, but not the center, turn the tie-rod adjusting screw (37), clockwise until the paper is cut the entire length.
- 7. If the shear cuts the paper in the center, but not the ends, turn the tie-rod adjusting screw (37) counter-clockwise until the paper is cut the entire length.
- 8. Make sure the scales (15) and (16) on top of the table are square to the blade, and also show the correct distance from the blade.
- Make test cuts to verify that the scales are correct.

Maintenance

ACAUTION Use care when working with or around the knives.

The 2-way upper knife can be removed and flipped 180°, for a sharp edge before having to sharpen the knife.

Periodically insert oil through the two oil fittings (127) atop the side panels. Use ISO VG32 or equivalent.

Wipe the knife lightly with oil.

Lubricate all pivot points on the machine daily.

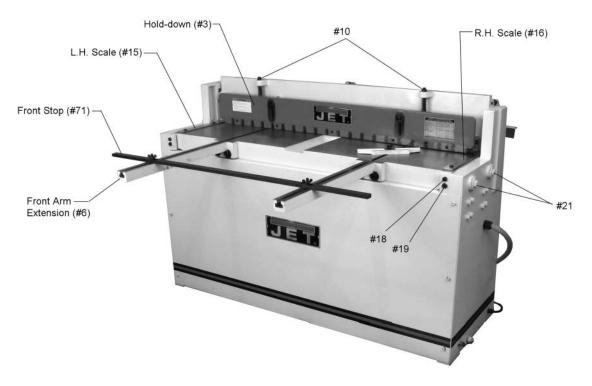

Empty the condensation cups on the air regulator as needed.

Spring Tension

The spring return can be adjusted on the hold down (3) by tightening the hex nuts (10).

Gib Adjustment

There are three hex cap screws (32) that can be adjusted for play in each shim (31). Adjust for smooth travel.

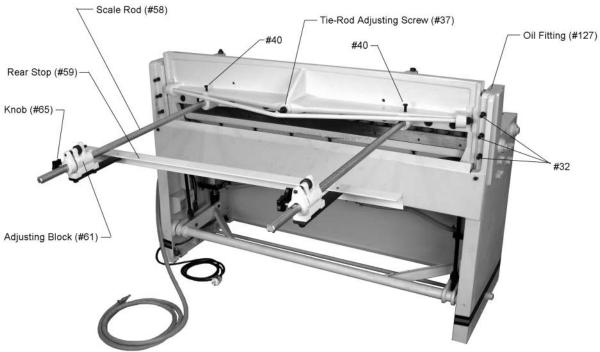

Figure 1

Electrical Connections

AWARNING Electrical connections must be made by a qualified electrician in compliance with all relevant codes. This machine must be properly grounded to help prevent electrical shock and possible fatal injury.

Grounding Instructions

The Shear is equipped with a 15 amp cord and plug set, with a grounding prong.

This machine must be grounded. In the event of a malfunction or breakdown, grounding provides a path of least resistance for electric current to reduce the risk of electric shock.

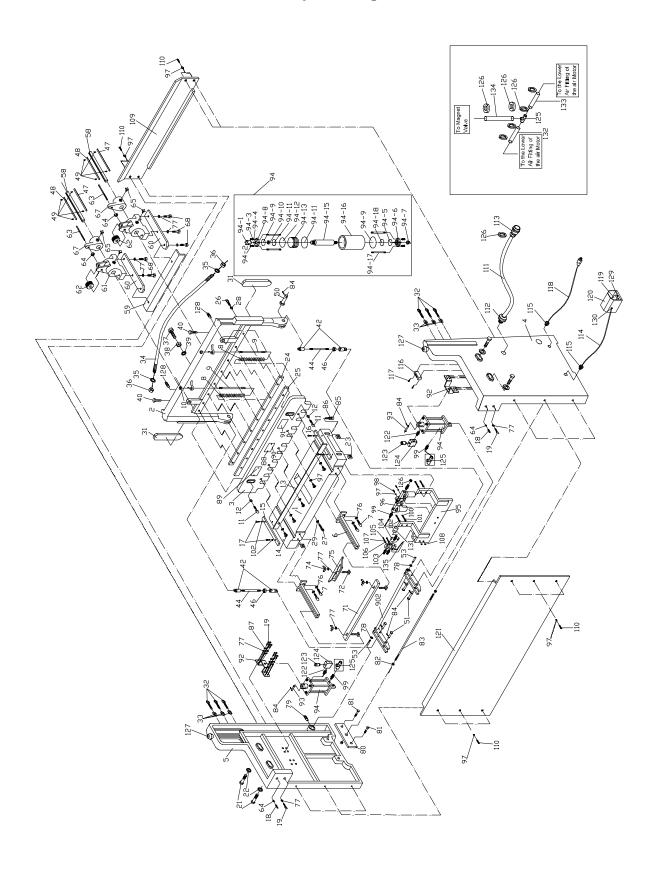

Improper connection of the equipment-grounding conductor can result in a risk of electric shock. The conductor with insulation having an outer surface that is green with or without yellow stripes, is the equipment-grounding conductor. If repair or replacement of the electric cord or plug is necessary, do not connect the equipment-grounding conductor to a live terminal.

Check with a qualified electrician or service personnel if the grounding instructions are not completely understood, or if in doubt as to whether the tool is properly grounded. Repair or replace a damaged or worn cord immediately.

Replacement Parts

Replacement parts are listed on the following pages. To order parts or reach our service department, call 1-800-274-6848, Monday through Friday (see our website for business hours, www.waltermeier.com). Having the Model Number and Serial Number of your machine available when you call will allow us to serve you quickly and accurately.
