## Productivity. Performance. Profits.

# Increase Productivity and Efficiency

**Less Cleaning** – Only clean gun fluid passage vs. traditional gravity cups that require significant cleaning time and solvent use

**Reduces Steps** – Mix and spray with one cup. Multiple filter options reduce the need to strain paint

**Clean Paint Jobs** – Sealed, contamination-free system

**Coatings** – Works with a wide variety of coatings

**Safety** – Less exposure to cleaning solvents and VOC's

**Storage** – Temporarily store unused paint between coatings therefore reducing paint waste

# Designed for Durability and Performance

## Liner Collapses Evenly

Liner system provides superior fluid flow, color match, and less over mixing. Spray at any angle including upside down.

## Multiple Filter Options

Choose the right filter for your job. Barrel filters offer additional savings, while disk filters provide sizable filtration for superior fluid flow of waterborne paints.

## Positive Locking Connection

Non-threaded easy on and off design allows for a tight and secure connection. Adapters available for virtually all guns.

## Self-Dispensing Packaging

**Mount. Dispense. Discard.** Conveniently packaged for production shops.
